Cloud tele-radiology SOFTWARE solution for RADIOLOGIST | HOSPITAL | IMAGING CENTER

multiple imaging sites | multiple consultant radiologist | multiple managers | integrated MS Word reporting station

Complete tele-radiology solution

The screenshot displays the IMAGEbytes MS Word Plugin 2.0 interface. The top window shows an MRI scan of the lumbar spine with a corresponding MS Word report. The report title is "MRI OF THE LUMBOSACRAL SPINE" and includes findings such as "Mild straightening of the lumbar spine" and "Modic type II changes". The bottom window shows the same interface with a file selection dialog box open, listing various medical document types like "JOINT WRIST.doc", "MR ANGIOGRAPHY OF BRAIN & NECK VESSELS.doc", and "MRI LSPINE NORMAL.doc".
